

*DOES YOUR SOX COMPLIANCE  
SOFTWARE WORK LIKE A SQUARE  
PEG IN A ROUND HOLE?*

- Designed using the COSO framework
- Interactive web-based system for continuous SOX monitoring
- Open-architecture solution that works with your existing systems
- Drill down to internal control tests from process maps or scorecards
- Alerts responsible parties of possible breaches of internal controls or test failure
- Dashboard tracking of internal control performance and history at every responsibility level
